

New Paradigm Laser

Reliable, Rapid Response

Laser Processing by the Experts:

- Prototypes
- Projects
- Production Cutting
- Project Management

Reliable on-time delivery.

Large capacity of high quality and flexible laser machines capable of handling prototypes, as well as small and large production volumes.

Expert 'nesting' capability (to optimize material utilization) ensures competitive pricing by controlling your costs.

Customer focused team strives to meet all of your needs.

Customer Focused Precision Laser Processing

Unsurpassed Quality and Laser Cutting Expertise

New Paradigm Laser is proud of our reputation for quality and excellence. Whether your project has tight tolerances, simple or complex components and configurations and/or reliable supply for long term complex projects, New Paradigm Laser is your highest quality alternative. Trust your work to the experts with the dedication to get it right, and on time.

On Time Delivery

Meeting even the tightest deadline is part of our customer focused culture. Lead times are typically a week or less. If you need the parts even sooner, just let us know and we will do our best to accommodate even the most urgent requirements. Deliveries can be expedited regardless of weather conditions with our internal service bay.

Large Capacity and Broad Capability

Exceeding your expectations with every opportunity, our production team utilizes a very large capacity of flexible precision laser cutting systems including our high speed Trumpf Laser and our fleet of busy precision Cincinnati machines. Our tables can accommodate sheet sizes from 48" x 48" to 72" x 216".

Expert Material Nesting

New Paradigm Laser understands the cost savings that efficient material nesting has on production. Our team of expert estimator and programmers bring years of experience to find the most effective way to save you money.

Extensive Material Range and On-site Inventory

Your project or production requirements can be quickly met with our vast supply of on-site inventory of over 120 combinations of material types, grades and gauges. These include:

Aluminum: 3003-H14, 5052-H32, 6061-T6

Stainless Steel: 304-2B & #4, 316-2B & #4

Carbon Steel: A366 CRS, A1011 HRPO, HR44W, HR50WT (including CAT 3), QT100, QT400

In addition to the more common materials, New Paradigm Laser also works with materials specific to our customers' needs.

"New Paradigm Laser provides us with the nesting details of our components allowing us to optimize material usage and reduce our overall material costs. Along with quality laser cut components, New Paradigm Laser provides part sorting, tagging and detailed shipping reports for easy identification at our fabrication shop"
